

How is this car doing?

A clear summary of what the car's systems reveal about its condition and history, including anything that deserves a closer look.

VEHICLE

G30

530e iPerformance · 2.0L B48 (B48B20M0)

VIN	WBAJ.....
Fuel	Petrol
Transmission	Automatic
Market	Europe
Assembly country	Germany

CURRENT MILEAGE

100,167 km

OVERALL ASSESSMENT

Check

Some items deserve a closer look during normal maintenance or follow-up diagnostics.

4 Areas clear	3 To check	30 Systems scanned
-------------------------	----------------------	------------------------------

3 KEY THINGS TO CHECK

01

Needs review

Faults

Fault codes found. Check the details.

02

Check

High-voltage battery

Battery capacity checks complete.

03

Check

Engine

Engine checks complete.

VEHICLE HEALTH SUMMARY

The vehicle recorded combustion roughness measurements across its cylinders. The system reported a high-voltage battery state of health of 81 percent.

AI-generated from this report. Review the detailed findings before relying on this summary.

Every area at a glance

02

Each row shows what was checked, the result, and what it means in plain language. Areas that need attention are highlighted in amber or red.

AREA	VERDICT	WHAT IT MEANS	SIGNAL
 Vehicle identity 30 modules checked 4 incomplete	Looks good	All responding modules provided matching VIN and module-date evidence.	
 Mileage 106 mileage records checked	Looks good	Mileage readings line up across available sources, with no rollback pattern detected.	
 Faults 30 systems scanned	Needs review	Fault codes point to an item that should be diagnosed before drawing a final conclusion.	
 High-voltage battery High-voltage pack	Check	High-voltage battery data needs follow-up on capacity, balance, or related fault history.	
 Engine Fuel, misfire, VANOS	Check	Engine readings are worth monitoring or re-checking during maintenance.	
 Gearbox Clutch & oil history	Looks good	Gearbox adaptation and oil-history evidence sit within the expected range.	
 Usage Driving stress & load	Looks good	Driving-load evidence looks normal for the available history.	

HOW TO READ THE VERDICTS

- **Looks good** - no concerns found.
- **Check** - worth a closer look or another check.
- **Needs review** - a finding needs follow-up.

HOW THE INDICATOR WORKS

The indicator reflects the result: green means Looks good, amber means Check, and red means Needs review. The marker stays in the same position for the same result.

IDENTITY & MILEAGE

Does it all add up?

This page checks whether the vehicle identity is consistent and whether stored mileage readings agree with the dashboard.

03

Identity check

The VIN and module dates should agree across the modules that responded.

POWERTRAIN HEALTH

How the powertrain is holding up

A plain-language look at battery, engine, and gearbox readings that were available during this inspection.

05

High-voltage battery

Capacity and balance readings

[Check](#)

Some battery readings sit near the expected boundary. Compare them with service history and re-check after a normal drive.

Battery capacity health

Recent charge balance history

Engine

Combustion, fuel, timing, and temperature

[Check](#)

One or more engine readings sit near the expected boundary. Re-check after maintenance or another drive, especially if symptoms appear.

COMBUSTION AND MIXTURE

Cylinder smoothness

Misfire history

Fuel mixture correction

TIMING, FILTERS, AND RUNNING QUALITY

Camshaft timing

Temperature history

Valvetronic movement

Gearbox

Clutch adaptation and oil-temperature history

[Looks good](#)

Shift adaptation and oil-temperature history look healthy in the available gearbox data.

Oil temperature history

Fill pressure

Fill time

USAGE HISTORY

How this car has been driven

Stored counters provide context on how the car was used, including trip patterns, drive modes, fuel-quality history, and signs of higher load where available.

06

Driving pattern

Looks good

A summary of the usage history available in this report.

The saved history does not point to unusually hard use. Plan service around mileage, age, and maintenance records.

Trip pattern

Mode mix

Eco 1.6% · Comfort 97.2% · Sport 1.2%

Fuel quality

Low quality No fill-ups · Average quality 4 fill-ups · Good quality 442 fill-ups

MODULE CODE	MODULE NAME	STATUS
icam2	All-round vision camera	No fault codes
sme_f15	Battery management electronics	No fault codes
zbe6	Controller (iDrive)	No fault codes
obc_g11	Convenience charging electronics	No fault codes
acsm5	Crash Safety Module	No fault codes
dme8ff_r	Digital Motor Electronics	No fault codes
eme_g12	Electrical machine electronics	No fault codes
eps_g11	Electromechanical power steering	No fault codes
gszfbhy1	Electronic transmission control	No fault codes

MODULE CODE	MODULE NAME	STATUS
gws_g11b	Gear selector switch	No fault codes
tfm_i1	Hybrid pressure refuelling electronic control unit	No fault codes
ihka_g05	Integrated automatic heating / air conditioning system	No fault codes
frr_g11	Long-distance range front radar sensor	No fault codes
sas_g11	Optional equipment system	No fault codes
srr01_h1	Rear radar sensor near range left	No fault codes
fzd_g11	Roof function center	No fault codes
fas_g11	Seat module, driver	No fault codes
vdp_g11	Vertical dynamics platform	No fault codes

TECHNICAL APPENDIX

High-voltage battery evidence

Capacity and balance readings from the high-voltage battery checks are listed as raw evidence.

Battery readings
2 battery readings available

1
Capacity checks

1
Balance checks

0
Needs review

CHECK	SCOPE	READING	SOURCE DATA	STATUS
Battery capacity health	Single estimate	81%	Basis: usable capacity estimate	Watch
Recent charge balance history	Saved readings	1.7%	Latest 1.4% · Samples 5	Watch

TECHNICAL APPENDIX

Engine technical evidence

This appendix lists stored engine readings: what was checked, where it applies, and the value recorded. Areas without usable data are omitted.

Engine data

Combustion, fuel, timing, exhaust, temperature

28

Readings checked

1

Needs review

CHECK	SCOPE	READING	DETAILS	STATUS
Misfire history	Cylinder 1	0	Stored misfires	In range
Misfire history	Cylinder 2	0	Stored misfires	In range
Misfire history	Cylinder 3	0	Stored misfires	In range
Misfire history	Cylinder 4	0	Stored misfires	In range
Fuel mixture correction	Multiplicative adaptation	0.98	+2.2 %	In range
Engine temperature history	Engine oil · Below 80 °C	24 %	468 h	Watch
Engine temperature history	Engine oil · 80-110 °C	75 %	1,444 h	In range
Engine temperature history	Engine oil · 110-135 °C	0.9 %	17 h	In range
Engine temperature history	Engine oil · 135-150 °C	0 %	0 h	In range
Engine temperature history	Engine oil · 150 °C and above	0 %	0 h	In range
Engine temperature history	Coolant · Below 98 °C	18 %	356 h	In range
Engine temperature history	Coolant · 98-112 °C	82 %	1,572 h	In range

CHECK	SCOPE	READING	DETAILS	STATUS
Engine temperature history	Coolant · 113-120 °C	0 %	0 h	In range
Engine temperature history	Coolant · 121-125 °C	0 %	0 h	In range
Engine temperature history	Coolant · 125 °C and above	0 %	0 h	In range
Cylinder smoothness	Cylinder 1	-0.7 rad/s ²		Watch
Cylinder smoothness	Cylinder 2	-1.6 rad/s ²		Watch
Cylinder smoothness	Cylinder 3	-0.7 rad/s ²		Watch
Cylinder smoothness	Cylinder 4	3.1 rad/s ²		Needs review
Camshaft timing	Intake	1.4 °		Watch
Camshaft timing	Exhaust	0.6 °		In range
Valve control	Valve lift tracking	0.1 °		In range
Valve control	Motor load warning	No event recorded		In range
Valve control	Motor overload	No event recorded		In range
Valve control	Position-control alert	No event recorded		In range
Valve control	Emergency-mode events	0		In range
Valve control	Permanent position errors	0		In range
Valve control	Stored position errors	0		In range

TECHNICAL APPENDIX

Gearbox technical evidence

This appendix lists stored gearbox readings: clutch adaptation values and oil-temperature history when available. Areas without usable data are omitted.

Gearbox data

Clutch adaptation, oil temperature

15

Readings checked

0

Needs review

CHECK	SCOPE	READING	DETAILS	STATUS
Clutch fill pressure	Clutch A	+111 mbar		In range
Clutch fill pressure	Clutch B	-163 mbar		In range
Clutch fill pressure	Clutch C	+57 mbar		In range
Clutch fill pressure	Clutch D	-22 mbar		In range
Clutch fill pressure	Clutch E	-139 mbar		In range
Clutch fill time	Clutch A	+30 ms		In range
Clutch fill time	Clutch B	+26 ms		In range
Clutch fill time	Clutch C	+10 ms		In range
Clutch fill time	Clutch D	+26 ms		In range
Clutch fill time	Clutch E	+28 ms		In range
Oil temperature history	-40-40 °C	486 h	13% of recorded time	In range
Oil temperature history	40-80 °C	1,855 h	50% of recorded time	In range

CHECK	SCOPE	READING	DETAILS	STATUS
Oil temperature history	80-90 °C	1,362 h	37% of recorded time	In range
Oil temperature history	90-95 °C	25 h	<1% of recorded time	In range
Oil temperature history	95-100 °C	1 h	<1% of recorded time	In range

TECHNICAL APPENDIX

Technical usage data

This appendix lists stored usage counters and related history retrieved during the inspection. Areas without usable data are omitted.

Usage data
Driving, fuel and protection counters
